

Rocks from Space Picture of the Day

March 10, 2009

Dr. Art Ehlmann in the West, Texas, strewn field on 3.8.9, with a newly-recovered 35 gram complete individual. Though he didn't recover this stone himself, he was standing with the property owner who did find it at the very moment of discovery. At the sprite age of 80, Art worked the field from sunrise to sunset with the stamina of a 30-year-old. The smile on his face in this image says it all!"
