Dear Sir:-

I have read in the Star-Telegram this morning that you were trying to track down a meteor seen in the sky about 7:30 P. M. Monday. I had previously read in the Daily-Oklahoman about some one seeing and finding a meteor which fell about the same time at some point in Eastern Oklahoma.

At 7:25 P. M. on last Monday, I was going East on Decatur-Denton highway, four miles East of Decatur and saw a very bright ball of fire falling out of the sky which appeared to be about one mile Northeast. It apparently burned out when within about one half mile of the earth.

Trusting that this information will be of some value to you in your research, I am

Yours very truly,

Boys
