

MONTOYA'S QUICK, GLIDING HANDS
Create arrangements that are uniquely his
Staff Photos by Lynn Ligon

Series Finale

Crowd Held Spellbound By Montoya

By RUTH DAVIS

The man with the multitude of tones is an expression which might well describe Carlos Montoya, flamenco guitarist, who held a large

audience spellbound at Select Series Wednesday.

Not a seat remained empty on the main floor and some people were seated in the balcony, as Montoya began his concert. At the end of the first number a thunder of applause greeted him.

The smiling middle-aged artist nodded and saluted the audience in appreciation. The audience was with him, fascinated by his frolicking notes, until, at last he received a standing ovation and the last note of his third encore died away.

Playing Resembles Drums

The sound which Montoya evoked from his instrument seemed almost to have personalities of their own as they tinkled, galloped, rippled, and flowed beneath his nimble fingers. Sometimes they resembled hoofbeats, tapping feet, or beating drums.

One selection sounded as though a deep voice and a silvery one were exchanging questions and answers in a language of their own, were joined by a full chorus of voices, and then returned to argue alone.

As the artist bent gently over his guitar, holding it as tenderly as a child, at times nothing seemed to move but his quick, gliding hands, employing the whole instrument, wood and strings to create the arrangements that are uniquely his.

Then he would throw himself into the music with head lowered intently and tapping foot.

It was evident that Montoya was enjoying his work.

Jokes About English

When called back for encores by applause and shouts of "more!", he introduced his three numbers, joking about his English and his tired fingers in a pleasant manner.

Good-natured laughter greeted the announcement that his final encore would be "St. Louis Blues" in flamenco style.

Montoya was dressed in black and scarcely seemed upon first sight to have been capable of thrilling crowds in Europe, the United States and Canada, but with the last warbling, rolling, singing notes of his guitar, Select Series goers knew why he had done just that.

His numbers included "Alegrias," "Fandango," "Tientos," "Petenera," "Buleria Del Zorongo," "Solea-Cana," "Zambra," "Guajiras," "Malaguena," "Tanguillo Gaditana," "Granaina," "Bulerias," "Fabrauca," "La Rosa," "Zambrilla," and "Jota."

Honors Day Event

300 Hear Dr. Pauling

Dr. Linus Pauling, recipient of two Nobel Prizes, presented a lecture on "A Molecular Theory of General Anesthesia" before a crowd of about 300 people in the Student Center ballroom last Wednesday night.

Dr. Pauling was a guest on campus during the third annual Honors Day observance Thursday and was guest speaker at the Wednesday night meeting of the University chapter of Sigma Xi which promotes scientific research on campus by faculty and students.

Dr. Winton H. Manning, professor of psychology at the University, was to be principal speaker at the Honors Day Convocation Thursday.

Dr. Pauling's lecture dealt with the molecular structure of general anesthesia placing emphasis on the substance xenon which is an anesthetic.

Formulates Theory

Dr. Pauling said he began to formulate his theory when he wondered how xenon, a substance which rarely forms compounds, could be an anesthetic.

"Throughout the years I collected information," he said. "When a piece of information relating to the problem came up, I had a new idea."

During the talk Dr. Pauling explained he was interested in the process of thinking up ideas.

"We have no special ability to have bright ideas," he said. "We have millions of ideas and then pick out the good ones."

Kids Professors

In the middle of his lecture, Dr. Pauling kidded professors.

"Textbooks don't tell you everything, professors don't know everything," he said. "Many things they think they know aren't right."

Dr. Pauling received his B.S. degree in chemical engineering from Oregon State College in 1922. In 1925 he graduated from California Institute of Technology with his doctorate in chemistry. He was associated with the school until 1962.

Dr. Neil C. Hulings, associate professor of biology and Honors Day committee chairman, introduced Dr. Pauling.

Applications Invited For Editors' Posts

Interested in editing The Skiff or The Horned Frog next year?

Dr. Comer Clay, chairman of the Student Publications Committee, invites applications from students who would like to be considered for Skiff editor for fall semester 1965, for Horned Frog editor for 1965-66, or for Skiff advertising manager for fall semester 1965.

Applicants must have maintained at least a 2.0 grade-point average. The Skiff editor must have completed satisfactorily at least three journalism courses. Advertising manager must have had the Advertising Principles course or enroll in the course while serving.

Application forms are available in the Journalism Department of-

fice. Applicants should read the official statement on "Policies, Practices and Procedures for Student Publications."

The application form and a letter addressed to the Student Publications Committee must be filed with the Journalism Department secretary in Rogers Hall 116 not later than noon, Friday, May 7.

Applicants will be interviewed by the Student Publications Committee Wednesday, May 12, at 3 p.m. in Room 120 of Rogers Hall.

Applicants and possible applicants are invited to discuss the nature of these three positions with Lewis C. Fay, Skiff adviser; Dennis Schick, Horned Frog adviser; or Dr. D. Wayne Rowland, Student Publications Committee secretary.

Miller Takes on Big Job -- Again

Last fall Howdy Week chairman Jack Miller quoted to new students the following advice: "Dream big dreams, then put on your overalls."

Over 200 pairs of overalls will go to work next fall, again under Miller's direction, in making TCU Howdy Week "America's Greatest Collegiate Welcome." The dates are Sept. 12-18, but work on the project, a \$6,000 undertaking, began in March.

The nomination of Miller, Shepherd, Mont., junior (and class favorite), was unanimously and enthusiastically approved by Congress.

Idea Man

The idea man behind many innovations of last year, he is already dreaming more big dreams

for next Howdy Week. The positions of 37 under-chairmen have been partially filled, but Miller is eager for more volunteers.

The credit for big-name entertainment last year, both the Lettermen and the Hope-Mancini show, goes largely to him, in his dual position of Howdy Week chairman and Entertainment chairman.

Reception Continued

Andy Williams is being considered for Homecoming next fall. Miller, who has been on the Entertainment Committee and the Homecoming Committee for two years, praised Sherry Grisham's work as a member of both committees and her recent appointment as Homecoming Chairman. Miss

Grisham was also secretary for Howdy Week.

The Chancellor's reception, begun last year by Miller, will be continued. He hopes to have Dr. Sadler present for this event, when all students may meet the top administrative officers.

Ideas are also brewing for a new selection for Howdy Week Queen. It has been proposed that finalists be announced at the Howdy Week dance Friday night and the winner chosen by the big name entertainers, who will crown her Saturday night.

Busy this year as a Sigma Chi, Bryson Club member, and Campus Chest auctioneer, Miller hopes to spend his time from now on in accomplishing the purpose of How-

dy Week—to get new students acquainted with each other and with school traditions.

His past success has been affirmed by the University of Okla-

homa, which has written it hopes to copy the Howdy Week plan. Very few schools, Miller explains, offer students opportunities to equal TCU's Howdy Week.

RECORD TOWN

A.C. Awards

Nominations For Prof Now Open

A professor who goes beyond the role of classroom teacher is the yearly recipient of the Activities Council Professor of the Year Award.

A plaque is presented at the A.C. Awards Banquet—May 11 in the Student Center ballroom.

The qualifications are two-fold, according to Mrs. Elizabeth Proffer, Student Activities adviser. The professor must not only be an excellent classroom teacher, but should also be active in the area of student activities on the campus.

Must Help Students

"He must have helped students expand their education through one of the activities programs on the campus," Mrs. Proffer said.

Anyone in the University may nominate a professor he feels fits these qualifications. All applications can be left in the Student Activities Office or in the P. and E. box in the Student Center.

Dr. George Fowler, professor of religion and Greek, received the award last year for his work with foreign students at TCU.

Others Receiving the Award

Others receiving the award include Drs. William Hall, Howard Wible, Ben Proctor, and Paul Wassenich.

There has been some confusion between this award and the one given yearly by the TCU Honors Program.

The Honors prof will be known as the recipient of the Honors Faculty Recognition Award, according to Dr. Wassenich, Honors Program chairman.

Dr. Wassenich said this award is given to the faculty member who has contributed to the intellectual life of the University.

Brite Professor Addresses Trainees at UT

William D. Hall of the Brite Divinity School faculty lectured at the University of Texas to 125 Peace Corps trainees preparing for work in India. Hall, who spent several years in India as a missionary, spoke on Hinduism and its practice by the people.

Don't make me laugh.

You mean to say,
I could
have bought
that big,
beautiful,
luxurious

Dodge Polara,
and I would
have gotten a
383 cu. in. V8,
carpeting,
padded dash,

foam seats,
and all
those
other things
at no extra
cost?

Who's laughing?

At Polara's prices, why clown around with smaller cars? See your Dodge Dealer.

Step right up and see Polara—with a 121 inch wheelbase, weighing almost 4,000 road-hugging pounds. Powered by a 383 cu. in. V8 that runs riot on regular. Padded dash, full carpeting. All at popular prices.

DODGE DIVISION  CHRYSLER
MOTORS CORPORATION

Air Force ROTC cadet Emmett McGill chats with Secretary of the Air Force Eugene Zuckert at the Arnold Air Society National Conclave held in Washington, D.C., April 10-12. McGill, Rankin Senior, was awarded one of two Link fellowships offered to outstanding Air Force ROTC cadets for the study

of advanced mathematics. Others in the picture are Gen. William C. Lindley, two sons of the famous Gen. "Hap" Arnold, and AFROTC cadet John D. Edgar of MIT, who was awarded the other Link fellowship.

Senate Plan Fails

The proposed student government change gained a unanimous vote of confidence in a called meeting of Student Congress shortly before the holidays.

However, the plan, which would amplify student voice in matters was not so unanimously endorsed by the University Council.

According to the Faculty Bulletin of April 21, the Council expressed "quick support and opposition." There is no agreement at present among the 22 members, who include two administrators, the registrar, the librarian, and 18 faculty members. Executive Vice Chancellor J. M. Moudy is chairman.

Revisions Committee

Joey Jeter was chairman of the Student Congress committee in charge of the revisions. The plan submitted to the University Council was as amended by a student-faculty-administrative committee which included Dr. Moudy and Vice Chancellor for Student Life Laurence Smith. It will be adopted for use next fall if: (1) The University Council approves it;

(2) the Administrative Council approves it, and finally (3) the student body votes affirmatively in a referendum early in May.

Senate Composition

The Faculty Bulletin explains the Senate:

"Composed for four administra-

Scholarship Opportunities In AFROTC

Sophomores enrolled in the Air Force ROTC will be competing for four full-tuition scholarships to be awarded in September.

The scholarships are part of 5,500 such awards which will eventually be made within the program at institutions across the country.

In addition to tuition, the money covers books, fees, supplies, and \$50 a month as retainer pay.

The present selection procedures cover three factors: score on the Air Force Officer Qualification Test, academic grade average for all college work and the assessment of a scholarship review board.

Students will meet the review board May 3, 5 and 6. Lt. Col. Chester V. Bogle Jr., Capt. Kenneth L. Thompson, Capt. Peter J. Webber, and Dr. Howard G. Wible will serve as reviewing officials.

tors named by the Chancellor, four elected faculty members and six students, this body would take action on matters primarily affecting students. Its decisions would be passed on to the appropriate office or University committee for implementation. If the officer or committee involved refuses to implement the decision, it must be returned to the Senate with 'cogent reasons' for refusal. It may be then appealed to the Chancellor. You need to think the whole idea over for several minutes to get the full implications."

The pros and cons concerned the responsibility of the University.

Debate centered around the threat to the responsibility of the University to maintain standards and the opportunity for the exercise of student responsibility.

History Society To Hold Lakeside Picnic

Phi Alpha Theta, honorary history society, will hold a picnic today at Eagle Mountain Lake beginning at 3:30 p.m. Members should stop by the History Department office to sign up. Members and guests are invited.

The final meeting is tentatively set for May 13. At this time Dorman Winfrey, state librarian at the Texas State Archives in Austin, will speak.

Dr. Murray Rohman Speaks For Downtown Kiwanians

Dr. Murray M. Rohman, professor of personnel administration and industrial relations here since 1954, was guest speaker at a meeting of the Downtown Kiwanis Club.

Dr. Rohman, formerly a practicing lawyer and negotiator in union-management contracts, now active in arbitration work, discussed "The Significance of Arbitration."

Holder of a doctorate in labor economics from the University of Colorado, Dr. Rohman is the author of articles in various law journals specializing in labor-management problems. He serves as chief industrial relations advisor

for the National Wage Stabilization Board in Washington, D.C.

Dr. Rohman, introduced at the luncheon by Raymond B. Wolf, holds membership in the National Academy of Arbitrators, American Mediation and Conciliation Service, and several business law organizations.

Dr. Ferre Visits, Speaks in Selma

The University's traveling philosopher, Dr. Gustav A. Ferre, returned last Friday from a preaching sojourn in Selma, Ala. Dr. Ferre declined comment on the journey saying he had not had time to prepare a statement.

Speaking on "The Biblical Faith" and "Philosophical Truth" May 2-3, Dr. Ferre will participate in the dedication of a new Religion Center at the University of Houston.

TV Popular Again

An Associated Press story on popular television shows of the college crowd which came over the wire a few days ago suggests that there is a surge of interest in television which seems to have evolved this year.

Cynthia Lowry, who filed the story in New York, took a small sampling at a well-known women's college which supports this position to a certain extent.

She said the college crowd is often ignored by television programmers in an industry that pays very close attention to its audiences, and surveys indicate that college students are among television's most infrequent viewers, presumably because they are so busy with their books, sports, and dates.

Some of the favorites of students on that campus, and no doubt others, are "Bonanza," "Bewitched," "Shindig," and "Man from U.N.C.L.E."

"Peyton Place," the ABC evening soap opera, also seems to be a favorite of the girls on this campus as well as others around the country.

At the women's college at which Miss Lowry took the sampling an informant told her that there had been a student petition to schedule the dinner hour a half-hour earlier so they could watch comedian Soupe Sales, who has a New York City program for young children that specializes in tossing whipped cream pies at human targets.

Television also has changed the fraternity and sorority meetings at a California college, other reports have confirmed. Greek organizations at this college supposedly changed their weekly meetings from Monday night to Tuesday night so that they would be able to watch "Man from U.N.C.L.E."

Whatever the case, television has had its impact on the college set, and if television programmers are ignoring this public they would be wise to recheck their samplings.

LITTLE MAN ON CAMPUS

"-AND- BY PLEDGING THE 'SIGMA PHI NOTHINGS' YOU'LL HAVE ACCESS TO OUR SPLENDID --FULLY EQUIPPED-- RECREATION ROOM."

Let's Think It Through

By LYNN GARLAND

On our plane trip home for the Easter holidays, we had an interesting experience. We had boarded the plane at Love Field looking forward to what is generally a pretty smooth flight. However, on this trip our big 707 was being flown by either a student pilot or a refugee from the Flying Tigers, and all the way to Atlanta the plane did a combination Jerk and A Go Go.

Fighting off nausea and stark terror, we turned to the passenger in the next seat and started a conversation. We soon discovered that our companion, a charming woman in her early forties, was a graduate of TCU.

Twenty Year Graduate

The woman had graduated over 20 years before, but her recollections of the school were very interesting and helped to make the flight more bearable. Of particular interest to us were her reminiscences of her favorite professor while she was an undergraduate.

"Dr. X made his course so fascinating," she said, "that I'm still studying the subject, even after all these years."

Nearly everyone has a favorite professor while at school, whom they will remember and admire long after they have graduated. After our conversation on the plane, we were determined to ask some of our fellow students the qualities they admired most in the profs they had had so far.

One of the most respected qualities, we discovered, was enthusiasm for the subject being taught.

A friend of ours summed up this quality pretty well when he said, "I know that all this material must seem elementary and old to my teacher, but he presents it to his class in such an enthusiastic manner that we can't help being interested."

Interest Praised

Another quality which won praise from several students was interest, not only in the course, but in the students taking the course.

Teachers who showed interest in students' questions and made themselves available for discussions of the subject on an individual basis rated high on the preference list.

Along this same line one coed commented, "While Dr. Y doesn't tell you the answer to a problem, he will offer guidance on how to find the answer. His course is difficult, but not impossible, and it is always interesting."

Students also expressed a preference for professors who showed courtesy and respect for their classes by dressing neatly and avoiding profane language.

"Good manners never hurt anything," one student said, and we agree.

Of course, we have only mentioned a few of the qualities which students admire in their teachers. We're sure that everyone could add many more to the list.

And we're sure that the professors have a list of the qualities they most admire in students. Maybe we can have a discussion on that.

Policy to Change?

The Greek Chaplains seminar on drinking last week produced no earth-shaking results, as many had probably predicted since only some 50 students attended, but it was enlightening to hear representatives from the administration, students, and Fort Worth openly discuss this topic.

We are glad to know that this major problem could be discussed openly and frankly by most factions. Although most of the six members of the panel agreed that a policy change on drinking would be impossible at this time, Dr. L. C. Smith, vice chancellor for Student Life, said afterwards that the policy probably will be changed as soon as the public's attitude on social drinking changes.

Dr. Smith illustrated by pointing out that smoking was at one time prohibited on the campus, but now it is accepted. He said of course drinking will never be as fully accepted as smoking because of the physical harm and danger that comes with drinking, but that drinking could become so socially acceptable that objections to a policy change on drinking would not be predominant. To what extent it will be changed is undeterminable.

As Deky McCoy, student representative on the panel, pointed out, the maturity of the students will be a primary factor in the consideration of a policy change. But this will always be a problem, whether we are concerned with drinking or something else.

The real problem will come when the administration changes the policy to alleviate the drinking problem that exists today. For new problems will arise that will take its place. However, how the University handles these new problems will be the deciding factor that will determine the worthiness of the change.

The Skiff

The Skiff is the official student newspaper at Texas Christian University, published Tuesday and Friday during college class weeks except in summer terms. Views presented are those of students and do not necessarily reflect administrative policies of the University. Represented for national advertising by National Advertising Service, Inc., 18 East 50th Street, New York 22, N.Y. Second-class postage paid at Fort Worth, Texas. Convention Studies Higher Math

An intense look at higher mathematics and the undergraduate preparing for future studies was held at the recent convention of the Mathematical Association of America.

TCU played host to the two-day event in Dan D. Rogers Hall earlier this month.

The annual meeting was attended by mathematics professors and high school teachers from Texas schools.

C.R. Sherer, TCU mathematics professor and secretary of the association, said that the program was two-fold: Research papers were presented and two guest speakers were heard.

"Most of the papers have been written by Ph.D. candidates and were presented to the convention for the first time," he said.

James Harvey, TCU graduate student, presented his paper on a characterization of finite dimensional linear spaces.

Another student, Margaret R. Wiscamb, gave a portion of her Ph.D. thesis at the Saturday morning session. Her paper is on symmetric neighborhood systems in strongly paracompact, completely paracompact, and strongly metrizable spaces.

E.R. Heinemann of Texas Tech served as chairman; C.R. Deeter, TCU, vice chairman; and Sherer, secretary-treasurer.

Sherer will be retiring from his

position this year, after holding the office since 1946.

The final session heard Dr. Richard D. Anderson from Louisiana State University speak on the program for undergraduates plan-

ning to do graduate studies.

Dr. William R. Scott, University of Kansas, chose as his topic "Infinite Symetric Groups."

The delegates attended a banquet in the Student Center and then saw the Little Theater production of "Playboy of the Western World."

Minister's Wife's Role Needs Special Study

Divorce rates suggest that being a wife isn't easy for many women, but some local ministers' wives are determined to smooth out whatever rough spots may be.

Every other year the Evening College offers a one-hour course—The Role of the Minister's Wife—which deals with the special problems in this field.

Mrs. Granville T. Walker, wife of University Christian Church's minister, has taught this course since 1956. Mrs. Walker received her master's degree from TCU in English, with a Bible minor.

Mrs. Walker has divided the course into four parts. It opens with an introduction and history

of the Disciples of Christ and their conception of the ministry. The second part of the course concerns the minister and his wife at work in the church and community.

The next division deals with personal helps. Such matters as the minister's family at home, living in the parsonage, the parents' relationship with their children raised in the parsonage, and entertaining in the parsonage are discussed.

The course is concluded with a study of the organizational life of the church. Not only the Disciples' church but the Ecumenical Council is covered in this study.

The majority of Mrs. Walker's students are ministers' wives, but several are preparing for their future roles as wives.

On Campus with Max Shulman
(By the author of "Rally Round the Flag, Boys!", "Dobie Gillis," etc.)

ONCE MORE UNTO THE BREACH

Today I begin my eleventh year of writing this column in your campus newspaper.

I wasn't sure I'd be coming back this year. After a decade of doing this column, I had retreated to my country seat, tired but happy, to enjoy a nice long rest. But last night as I sat on my verandah, peaceful and serene, humming the largo from *A Long Day's Night* and worming my dog, a stranger suddenly appeared before me.

He was a tall, clean-limbed man, crinkly-eyed and crooked-grinned, stalwart and virile. "How do you do," he said. "My name is Stalwart Virile and I am with the Personna Stainless Steel Razor Blade people."

"Enchanted," I said. "Take off your homburg and sit down." I clapped my hands sharply. "Norman!" I called. "Another chair for Mr. Virile!"

"Another chair for Mr. Virile!"

Obediently my dog trotted away and returned directly with a fanback chair of Malayan rattan. He is the smartest dog in our block.

"I suppose you're wondering why I am here," said Mr. Virile, seating himself.

"Well, sir," I replied, my old eyes twinkling roguishly, "I'll wager you didn't come to read my meter."

You can imagine how we howled at that one!

"That's a doozy!" cried Mr. Virile, finally catching his breath. "I must remember to tell it to Alice when I get home."

"Your wife?" I said.

"My father," he said.

"Oh," I said.

"But enough of wit and humor," he said. "Let us get down to business. How would you like to write a campus column for Personna Stainless Steel Razor Blades?"

"For money?" I said.

"Yes," he said.

"My hand, sir," I said and clasped his. Warmly he returned the pressure, and soft smiles played upon our lips, and our eyes were moist with the hint of tears, and we were silent, not trusting ourselves to speak.

"What will you write about in your campus column?" asked Mr. Virile when he was able to talk again.

"I will take up the burning issues that vex the American undergraduate!" I cried, bounding to my feet. "I will explore, without fear or favor, such explosive questions as 'Are roommates sanitary?' and 'Should proctors be given a saliva test?' and 'Should capital punishment for pledges be abolished?' and 'Can a student of 19 find happiness with an economics professor of 80?'"

"And will you also say a pleasant word from time to time about Personna Stainless Steel Razor Blades?" asked Mr. Virile.

"Sir," I said simply, "what other kind of word except pleasant could I possibly say about Personna Blades, which give me more luxury shaves than Beep-Beep or any other blade I might name?"

"Another of my products is Burma Shave," said Mr. Virile. "Can you find it in your heart to mention Burma Shave occasionally?"

"But of course!" I declared. "For is not Burma Shave the whisker-wiltingest lather in the land?"

"Yes," he admitted.

And then he shook my hand again and smiled bravely and was gone—a tall silhouette moving erectly into the setting sun. "Farewell, good tonsorialist!" I cried after him. "Aloha!"

And turned with a will to my typewriter.

Atom Parley Invites Dr. Everett

Dr. John T. Everett, associate professor of government and Graduate school assistant dean, has been selected to participate in an Institute on Nuclear Science and World Politics at Oak Ridge, Tenn. Institute of Nuclear Science.

Sponsored by the Atomic Energy Commission and the Carnegie Endowment for International Peace, the April 12-30 session intends to further the exchange of knowledge between nuclear scientists and persons in the realm of international affairs.

Seventeen international relations specialists, from the State Department and various colleges and universities, will join physicists and natural scientists in the lecture-seminar meetings.

The first week's topic will be "The Growth of Nuclear Science and Technological Society." Focus will be on "Nuclear Technology and National Development" during the second week and on "Nuclear Arms and World Politics" the final week.

The only Southwesterner invited to participate, Dr. Everett is a former faculty member at Western College for Women at Oxford, Ohio, and Ohio University.

FULL OR PART TIME

Here's an unusually fine opportunity. We're looking for a man for our sales organization. This is dignified career selling, representing a financial institution. A prestige "product." High commission. Many of our men earn \$15,000 after two years. Guaranteed high income during 2½-year training course. If you've just graduated from college and are still looking around for the right thing, or are interested in part-time work until graduation, let's talk it over. John W. Zeigler, ED 2-8939.

'Seminar on Wheels'

Home Ec Tour in Texas

A "Seminar on Wheels," during which students will make an extended tour of Texas, is a new summer offering.

The University Home Economics Department will offer the course, with class meetings conducted at Salado, Austin, San Antonio, Houston and other Texas cities.

"Seminar on Wheels" is to be conducted as a three-week workshop and discussion seminar on designing, production, communication, and research in the home furnishing industry. The course will take teachers and students behind the scenes to see how the industry operates.

Counts as Credit

The course will offer two to three semester hours credit to both graduate and undergraduate students. The course will be conducted under

the direction of Dr. Edna P. Brandau, chairman of the Home Economics Department.

Dr. Brandau, an expert in consumer education, has gained a national reputation as a teacher and lecturer. She has traveled to many places of interest to bring basic facts about the industry into her classrooms and has conducted groups of teachers, students, and other professional home economists to many points of interest in the United States and Western Europe.

"Teachers, undergraduate and graduate students and probably some professional people will make up the class," Dr. Brandau said. "All the details of the trip haven't been worked out yet."

Tours Scheduled

The course will be offered during the second six weeks of the Summer semester, July 18 through August 6.

The class will travel by bus and visit industrial plants, as well as collections of historical interest in Texas. Hotels, motels, and restaurants will be selected to give additional aesthetic aspects of the home environment.

Places such as Salado, New Braunfels, Austin, Fredericksburg, San Antonio, Laredo, Port Lavaca, Houston, Lufkin, Nacadosches, Longview, Jefferson, Dallas, and Fort Worth will be included.

Tuition is \$25 per credit hour. Cost of transportation and housing, to be shared by members of the group, is not yet determined.

Rooms with single beds for each person will be reserved while in Fort Worth and other towns on the trip.

"This will be the first course

of this type ever offered at TCU," Dr. Brandau said. "While on the trip, the class will observe how certain types of fabrics are made. The class will also observe the constructing of furniture.

Dr. Charles Kemp Guest Speaker At Prof Series

Dr. Charles Kemp, of the Brite Divinity School will address interested students on the subject of "Religion and Psychology" at 3:30 Wed., May 5, in Room 204 of the Student Center.

Dr. Kemp's talk is part of the Prof Series, under the direction of a subcommittee of the Forums Committee of the Activities Council.

Casa Offers Discount To Students

Students have the chance to buy two Casa Manana theater tickets for the price of one to attend the upcoming summer season shows.

The season opens May 24 with "South Pacific." Others to follow are "The Most Happy Fella," "The Music Man," "Roberta," "Camelot," "11 In The Shade," and "A Funny Thing Happened On The Way To The Forum." The season will close with "The King And I," which opens Aug. 30.

Students may go by Casa's box office, 3101 W. Lancaster, to buy two tickets for the price of one anytime until noon on the day of the performance.

Library Slates Book Sale

A wide assortment of books will be placed on sale to faculty and students by the library May 6 and 7.

The sale will be held in the large group study room on the first floor of the library at the foot of the North Stairs from 8:30 a.m. to 5 p.m. during the two days.

The books, received as gifts over a period of three years, were received from donors who agreed to let the library dispose of them as it saw fit.

"The library is selling the books because they duplicate titles already on the shelves or because they are not titles which should be added to an academic library for various reasons," said C. Glenn Sparks, head librarian.

All books for sale have been previously offered to Jarvis College and have been rejected by its library for the same reasons.

Prices will range from 5 cents to \$1 per book. The library will use the money taken from the sale to buy books it needs.

By solving problems in astronautics, Air Force scientists expand man's knowledge of the universe. Lt. Howard McKinley, M.A., tells about research careers on the Aerospace Team.

(Lt. McKinley holds degrees in electronics and electrical engineering from the Georgia Institute of Technology and the Armed Forces Institute of Technology. He received the 1963 Air Force Research & Development Award for his work with inertial guidance components. Here he answers some frequently-asked questions about the place of college-trained men and women in the U.S. Air Force.)

Is Air Force research really advanced, compared to what others are doing? It certainly is. As a matter of fact, much of the work being done right now in universities and industry had its beginnings in Air Force research and development projects. After all, when you're involved in the development of guidance systems for space vehicles—a current Air Force project in America's space program—you're working on the frontiers of knowledge.

What areas do Air Force scientists get involved in? Practically any you can name. Of course the principal aim of Air Force research is to expand our aerospace capability. But in carrying out this general purpose, individual projects explore an extremely wide range of topics. "Side effects" of Air Force research are often as important, scientifically, as the main thrust.

How important is the work a recent graduate can expect to do? It's just as important and exciting as his own knowledge and skill can make it. From my own experience, I can say that right from the start I was doing vital, absorbing research. That's one of the things that's so good about an Air Force career—it gives young people the chance to do meaningful work in the areas that really interest them.

What non-scientific jobs does the Air Force offer? Of course the Air Force has a continuing need for rated officers—pilots and navigators. There are also

many varied and challenging administrative-managerial positions. Remember, the Air Force is a vast and complex organization. It takes a great many different kinds of people to keep it running. But there are two uniform criteria: you've got to be intelligent, and you've got to be willing to work hard.

What sort of future do I have in the Air Force? Just as big as you want to make it. In the Air Force, talent has a way of coming to the top. It has to be that way, if we're going to have the best people in the right places, keeping America strong and free.

What's the best way to start an Air Force career? An excellent way—the way I started—is through Air Force Officer Training School. OTS is a three-month course, given at Lackland Air Force Base, near San Antonio, Texas, that's open to both men and women. You can apply when you're within 210 days of graduation, or after you've received your degree.

How long will I be committed to serve? Four years from the time you graduate from OTS and receive your commission. If you go on to pilot or navigator training, the four years starts when you're awarded your wings.

Are there other ways to become an Air Force officer? There's Air Force ROTC, active at many colleges and universities, and the Air Force Academy, where admission is by examination and Congressional appointment. If you'd like more information on any Air Force program, you can get it from the Professor of Aerospace Studies (if there's one on your campus) or from an Air Force recruiter.

Concert Band To Present May 4 Program

The TCU concert band, directed by Dr. James Jacobsen, will give a program Tuesday, May 4 at 8:15 p.m. in Ed Landreth Auditorium.

Included will be "Polaris—Concert March" by George Kenny, "Pastorale" by Clifton Williams, "Gay Vienna" by Johann Strauss Jr., and "Driftwood Patterns" by Julian Work. Student conductor Curtis Wilson will direct "Driftwood Patterns."

The program also features "Incantation and Dance" by John Barnes Chance, "Washington Post March" by John Phillip Sousa, and "Symphony No. 3 for Band" by Vittorio Giannini.

University Accepts \$200 Gift

A \$200 unrestricted gift to TCU by the Johns-Manville Building Products Division of Fort Worth was announced by Dr. M. E. Sadler.

The gift was presented by G.A. Petters as a part of a program initiated in 1955. The Johns-Manville program provides financial aid to a selected list of accredited, non tax-supported colleges and universities.

Orson Welles embraces Rita Hayworth in the exciting final sequence of "The Lady From Shanghai," tonight's Friday Night Flick presentation. The murder mystery ends in an amusement park hall-of-

mirrors where the murderer has come to silence Welles, who knows too much about the crime. Everett Sloan also plays in the film.

Friday Flick

'The Lady From Shanghai'

Orson Welles' suspenseful "The Lady From Shanghai" is tonight's Friday Night Flick presentation.

The mystery film will be shown at 7:30 p.m. in the Student Center ballroom. Single admission is 25 cents.

One of Welles' most visually in-

teresting films, "The Lady From Shanghai" tells the story of a young adventurer (named Michael O'Hara) who gets involved in a murder plot when he accompanies a beautiful woman (Rita Hayworth) and her lawyer husband on a cruise.

Glenn Anders portrays the horrendous Dr. Grisby, a character who anticipates many of the villains pitted against James Bond in the 007 films.

As usual in Welles films, there are ingenious touches throughout in dialogue, camera work, editing, characterizations and situations.

The film starts out as a leisurely pleasure cruise to Acapulco. A grim triangle develops involving Welles, Miss Hayworth and Everett Sloane, her crippled husband who delights in sadistic mental cruelty.

The climax of the film has become a classic sequence in film history. In a deserted amusement park "fun house," the triangle is broken in a showdown. There are shots of a fast-paced chase through the fun house (including a steep slide) ending in a hall of mirrors shoot-out.

Welles was praised for the technical incredibility of "The Lady From Shanghai." Time Magazine went so far as to say that it was by far the most interesting Hollywood film of 1948.

There are low camera angle shots and optical distortions. Welles used low-key lighting to add to the atmosphere of suspense and terror.

It was in this film that Welles built up the star image of his (then) wife, Rita Hayworth. He had her dye her hair blonde and wear it over her head. She now claims that he (Welles) "almost

Choir Set To Appear At Festival

The a cappella choir, directed by B. R. Henson, will present a program of mixed religious and secular music as part of the Fine Arts Festival Sunday, May 2, at 3 p.m. in Ed Landreth Auditorium.

Selections on the program include "Este Dies Trophei" by Alessandro Scarlatti, "Priceless Treasure" by Bach, "Vesperae Solennes de Confessore" by Mozart, "Psalms for Mixed Chorus" by Greig, "Songs of Nature, Op. 63" by Dvorak, "Create in Me, O God" by Brahms, and "Choruses from the Lark," arranged by Leonard Bernstein.

Reid Bunger will assist Henson.

Festival Offers Chamber Music

Kenneth Schanewerk will conduct selections by the chamber orchestra Monday, May 3, at 8:15 p.m. in Ed Landreth Auditorium. The presentation is part of the Fine Arts Festival.

Works to be presented include "Suite in A Minor for Flute and Strings" by Telemann, "Concerto Grosso in F Major" by Vivaldi, and "Divertimento for String Orchestra" by Bartok.

Rejuvenated Frogs Meet UT

Purples, Longhorns In Austin Twin Bill

By BILL LACE

Texas will be fighting for its life and TCU its revenge today and Saturday when the teams clash in Austin in a crucial SWC baseball series.

The Longhorns' 4-1 loss to Baylor Tuesday dropped them into a first-place tie with Texas A&M, which defeated Rice, 8-3. Both teams have 8-3 loop marks.

Bibb Falk's squad will be led by Ward Summers, Gary Moore and Joe Hague at the plate and John Collier on the pitching mound.

Texas defeated the Frogs, 5-4, in their first meeting of the year in Fort Worth on a series of bloop and broken bat singles.

Tuesday, the Frogs continued their domination of SMU by defeating the Ponies for the 16th consecutive time in a string that stretches back to 1962.

★ ★ ★

Ronnie Paul turned in a near faultless mound performance in limiting SMU to two hits and a pair of walks. The tall left-hander didn't allow a base runner until J.D. Smith walked to open the SMU half of the sixth inning.

Paul kept his no-hitter going until the eighth, when J.W. Davis singled between short and third. The only real threat by the Mustangs came in the ninth when a walk and a triple put men on second and third with one out.

Paul then bot Ralph Hamm on a grounder to third and made Stan Wetsel his 13th strikeout victim of the afternoon to wrap up the victory.

★ ★ ★

The Frogs broke a 0-0 tie in the fourth when Gary Barnard singled to center and took second when the SMU center fielder let the ball get by. Jim Miller's single brought

Cindermen Set For Church Meet

TCU cindermen will be in Dallas Saturday for the annual "Preachers' Meet" with SMU and Baylor.

Running for the Frogs in the 440 relay will be Bruce Teagarden, Neil Newsom, Byron Little and Phil Shaffer. Shaffer, Little and John Wade will run the 100 and 220-yard dashes. Teagarden and Newsom will also run the 440-yard dash.

Roger Hunt, Herb Davis and Ellis Ramsey will run the 880, while Ken Huffman runs the mile and three-mile.

John Charleton will run the high and intermediate hurdles, while Charles Young is competing in the high jump.

Young, Charles Mitchell and John Truelson will throw the discus. Truelson will also throw the javelin, and Richard Sullivan the shot put.

Golfers Play Ags

The University golf team will play its last conference match Friday against A&M. A win over A&M will give the Frogs second place, since U.T. has already won the conference title with its 5½-1½ victory over SMU.

Tuesday, TCU downed North Texas, 4-3, at Diamond Oaks.

Barnard home for the Frogs' first score.

Frank Windegger's crew added two more in the fifth courtesy of SMU first baseman Harold Richardson. After two men were down, Ron Phillips rolled an easy grounder to the pitcher Bob Bohren. Bohren turned and threw to first, but Richardson dropped the ball. Jimmy Duffey then doubled, scoring Phillips, and scored himself on a double by Ronnie McLain.

★ ★ ★

The Frogs added their final tally in the eighth when McLain doubled, stole third, and scored on Miller's long fly to center.

The victory was the seventh in eight starts for the rejuvenated Frogs and the fourth in a row for Paul. The Purples' conference record now stands at 3-8, the same as Rice.

After the Texas series, the Frogs have two games left, both against SMU on May 7-8 in Fort Worth.

Brannon Inks Cage Pact With Haltom Star Williams

Barry Williams, all-state center from Haltom, has signed a letter of intent to play for TCU, Frog Coach Buster Brannon announced Tuesday.

Williams surprised many of the state's basketball experts by signing the letter of intent. He had supposedly been leaning toward Texas, where former teammates Billy Arnold and Larry Lake are playing. Instead, he chose TCU.

"Barry is a fine prospect," said Brannon. "Needless to say we are happy to have him."

The Buff star had a 21.6 average in 25 games. He snared an average of 15 rebounds per game and was instrumental in Haltom's winning of the district championship.

Brannon said Williams' size, 6-5 agility and scoring touch will be a big assist to the Frogs.

Purple, Texas Netters Meet At Ridglea CC

TCU netters encounter the University of Texas Saturday and play a non-conference match with North Texas State University the following Tuesday.

The Frogs will play A&M in a make-up match May 5 with the Southwest Conference tournament scheduled for May 6, 7, & 8.

Ken Roach and Charlie Williams continue to lead the Frogs in scoring.

In a Southwest Conference match Monday, the Frogs' defeated Baylor netmen 4-2.

This leaves the Frogs with an 11-13 conference record with only two matches remaining before the Conference tournament.

Phi Delta Theta Bob Barker strolls back to the dug-out as Tommy Bera and Bob Sanders contest the umpire's decision that may have cost Sigma Alpha Epsilon their first defeat. The Phi Delt won, 3-2.

Last Regular Meeting

Frog Club Names O'Brien; Spring Outing Set May 14

Davey O'Brien, all-America quarterback of TCU's 1938 national championship football team, was elected president of the Frog Club Monday afternoon in a meeting held at the Ex-Lettermen's Clubroom in Daniel-Meyer Coliseum.

Leading the TCU booster group into its silver anniversary year, O'Brien said in his acceptance speech he hoped he could do as well as past presidents, and if he did only half as well, he should be a tremendous success.

Other candidates presented by former Fort Worth mayor and past Frog Club president Tom McCann, chairman of the nominating committee, and then approved unanimously by members, were Lee Hertel, executive vice president; Dick Lowe, first vice president; I. B. (Barney) Chapman, second vice president; and 50 other vice presidents.

R. B. Cannon was re-elected sec-

retary and W. A. Landreth was re-named to the treasury position.

★ ★ ★

Sixty-six members were named to the Advisory Board.

The newly elected officials will take office Sept. 1, 1965 and serve until Aug. 31, 1966.

Paul Ridings, publicity director, announced the club's annual Spring Sports Outing for all varsity and freshmen athletes and their dates or wives will be at Lake Arlington's Fun 'n Sun Club May 14. All Frog Club members and their families were invited to the feast, which will also feature skiing, swimming and golf.

TCU coaches Abe Martin, Buster Brannon, Mal Fowler, Walter Roach and Allie White were introduced.

Martin, commenting on the fruits of recent recruiting, said, "Norman Buliach looks like the best candi-

date we have signed. He's a big man and quick for a 200 pounder.

Turning to the varsity outlook for fall, the veteran TCU mentor said, "We have a lot of youth, fire and effort. We are just starting out to win the world and we are going to have a lot of fun getting there. We will never be embarrassed on the field this year."

★ ★ ★

Dick Hazlewood, president of the Frog Club who is stepping down after serving the maximum two terms, introduced Waller Moody, outgoing president of the Ex-Lettermen's Assn. and Boogie Robinson, president-elect.

Hazlewood congratulated Moody and the Frog Club on the new clubroom, completed at the end of the 1965 football season, and thanked the association for use of the room for the election meeting.
