Speaker Satterwhite has delayed his calling of the Legislature in special session, in spite of the appeal of influential people of Texas and over 50 Legislators. The Success is not in favor of impeachment of the present Governor, but we do believe that the Legislature should meet and if possible stop the graft that appears to be going on, and show up the present administration inability to handle same. We would rather have the present governor than to put the Lieutenant Governor in the chair. That is we don't think the crst would justify the change, they are about the same caliber.
