29 BROADWAY

::

NEW YORK CITY

December 1st, 1925.

Mr. Amon G. Carter,
Star Telegram,
Port Worth, Texas.

My dear Amon Carter,

The enclosure from the New York Times to-day would certainly indicate "Ma" has her war paint on; apparently a bit jealous with that party. As a matter of fact, I am jealous myself.

I had a good time teasing Marcellus Foster a year ago in September when he drove me over to the Advertising Convention in Galveston, about his support of this dear old lady. I told him then I thought he would live to see the day that he would regret it. I have been watching her regime all along with considerable interest, feeling that just such an incident would happen.

I am mighty glad that you at least have had enough backbone to state just where you stand regarding her. Not only the "eyes of Texas" but, I believe, the whole United States are upon you and backing you in this campaign.

With best wishes to Colonel Wortham and the rest of your organization, I am

Sincerely yours,

P. S. Appan 0
