Mr. Oscar Menning,
Ft. Worth, Texas

Dear Mr. Menning;

In today's Star Telegram we saw an item about a Meteor Monday. Until this article appeared in the paper, I was not aware of what it was I saw. My Sister Betty Blanche and I saw this fire ball on Monday about the time reported in the paper.

From our home one mile West of Farmersville, the meteor appeared to be almost due North of us, possibly a little East of North and was traveling Northeast.

I would like to hear more of where it possibly fell. I hope this little information I am giving will help enable you to locate the meteor.

Very sincerely,

Zeb W. Rike ZWR
