

1973 Feb. 23

Mr. Lawrence H. Conklin,
2 West 46th St.,
New York, N..Y.. 10036

Dear Sir:

In your recent letter you said when you located the specimens of Libyan Desert Glass you would submit them to me.

I note your List No. 31 received yesterday has a piece as Item 45.

I would be interested in any and all specimens that you have and would like to have this sent on approval, with a likelihood that I will take it.

Sincerely,

You wouldn't recognize the Glorieta piece since it has been repolished and re-etched and cleaned up in general. Huss thought maybe it had been in a fire from the way it looked but the figures weren't destroyed to any extent as great heat would do.
